

IGeS Bulletin N. 10

Summary

Foreword

I

I section: "Reviewed Papers"

Asurvey of gravity field modeling applications of the Input-Output System Theory (IOST)

V.D. Andritsanos, M.G. Sideris, I.N. Tziavos pag. 1

MEDYS 1999 - The IGeS Cross over adjustment with a new software for the SST in the Mediterranean Sea

A. Piatti, G. Venuti pag. 18

Improvement of the regional gravity model in China and its vicinity sea by combining the satellite altimeter and gravity data

Yang Lu, H.Y. Wang, H.T. Hsu pag. 29

The Best Fitting High-Order Geopotential Model for the Medium to Long Wavelength Component of the Peninsular Malaysia Geoid

Zarina Ahmad-Berger pag. 35

Exploring the Detailes Structure of the Local Earth's Gravity Field using Fractal and Fourier Power Spectrum Techniques

K.F. Zhang, W.E. Featherstone pag. 46

The Sudanese Gravimetric Geoid 1998: Stokesian Approach

Hassan H. Fashir, A. Majid, A. Kadir pag. 59

Geopotential Models Comparison in Algeria

S.A. Benhamed Dho, S. Kahlouche pag. 78

The New Gravimetric Geoid in Algeria

S.A. Benhamed Dho, S. Kahlouche pag. 85

The effect of high precision bathymetric model on geoid computation

J. Catalao, M.J. Sevilla pag. 91

GPS/levelling Traverses for Testing a Gravimetric Geoid Solution in Eastern Andalusia (Spain)

A.J. Gil, L.Biagi, C.de Lacy, G. Rodriguez-Caderot pag. 100

II Section : "Communications and News"

Report on activities of IAG Commission X:

Sub Commission for South Asia and The Pacific

J.Manning, pag. 107

Report The Fourth International School on "the Determination and Use of the Geoid" pag. 115

South America Geoid 2000 - Workshop pag. 119

IGeS Working Group

T.Gruber pag. 120

IAG/IAPSO Symposium pag. 123
